

Felt insoles

Woolpower manufacture under layers, mid layers and socks from Merino wool in Östersund, Sweden. Even though the production line has been optimized through experience and knowledge during more than 40 years in the business, some textile waste will inevitably arise.

Due to the excellent properties of the material, the waste is simply too good to discard. Instead, it is being used to produce Felt insoles. Insoles that combine the natural properties of soft Merino Wool with the durability of synthetics, making them insulating, moisture handling and self cleaning.

In other words, insoles that will keep your feet dry and warm regardless of the weather. Because of the recycled origin the colors vary with the production of other garments, making each insole unique.

Art no: 571514

Colors: Mixed

Made in Sweden

Material

Merino Wool	50%	22.5 micron	From South America
		Mulesing free	Superwash
Synthetics	50%	Polyester	Polyamide

Properties

Thickness	4,5 mm
Weight	950 g/m ²

Size	36-37	38-39	40-41	42-43	44-45	46-47	Tolerance
Width (cm)	8.0	8.5	9.0	9.5	10.0	10.3	± 1 mm
Length (cm)	24.0	25.0	26.5	28.0	29.5	30.5	± 2 mm
Weight per pair (g)	22	26	30	34	38	42	± 3 g
